For those of you who have schools, one challenge has always been how to pay coaches. I want to share with you some good news!

Colorado passed a law a while back that allows non-profit organizations to classify coaches under the 1099 Contractor Status. We have always classified coaches as Employees, and need to continue to do so for those who are already employees but do it in addition to their normal position.

However, this could present an opportunity if you have coaches who are coaches only. Please see the attached documentation about the law and a sample contractor agreement.

As always, please let us know if you have questions through people.support@archden.org.
